# THE RELENTLESS PURSUIT OF PERFECTION.

Riding pleasure starts long before you get onto your motorcycle. Because when you know your safety is taken care of, you're free to enjoy the buzz of anticipation whenever you suit up for the next journey. That's why BMW Motorrad created the C.A.R.E. stamp of approval. C.A.R.E. stands for Concept of Advanced Rider Equipment, and represents the unwavering commitment to **safety, innovation, comfort** and **quality** that goes into designing every item of BMW Motorrad rider equipment.

Each product is years in the making. Whether we're talking about the hard-wearing new materials developed by a dedicated R&D team, the sophisticated design elements that increase both protection and comfort, or the testing methods devised and employed in-house, the highest standards are applied from start to finish. This relentless pursuit of perfection allows BMW Motorrad to ensure that its products meet standards far more stringent than CE and EU norms. Only then will they receive the C.A.R.E. stamp of approval. We want you to enjoy riding your motorcycle – and that doesn't just mean meeting standards. It means surpassing them, in everything we do.

Find out more at

## SAFETY

Safety is the number one priority when out on the road. And this doesn't just apply to the bike itself – it means having the right protective clothing, too. When riders take to the tarmac, they're completely exposed, and there's a lot going on around them. They need to be prepared for anything that comes their way. That's why safety is one of four C.A.R.E. criteria, and central to the development of our rider equipment. Every last detail is subject to intense scrutiny to ensure comprehensive protection.

We take great care in ensuring that our products are compatible with one another. Whether you go for a BMW Motorrad jacket, trousers and helmet, or combine several other products, each item must function as part of a single protective unit that leaves no part of the body vulnerable.

On all of our trousers, jackets and suits, those areas most at risk in the event of an accident are reinforced, double stitched and fitted with state-of-the-art CE protectors. This ensures the garments can withstand all the usual stresses and strains of day-to-day riding, and even the hardest impacts on asphalt and gravel, without sacrificing freedom of movement.

The materials and treatments, the manufacturing techniques, and every test at every stage all reflect the pursuit of one goal: to provide riders with the highest level of active and passive safety and the most enjoyable ride possible. After all, at BMW Motorrad, safety is about providing total peace of mind.

## COMFORT

Just like safety, comfort is a crucial factor in the development of rider equipment. Ultimately, it's about providing maximum passive protection while ensuring riders are not distracted by any of the garments they are wearing.

Whatever the weather conditions, and however hot or cold it may be, anything less than total comfort might diminish their ability to react. That's why BMW Motorrad clothing includes the latest ventilation and membrane technologies. It's also why we design our helmets to keep wind noise to a minimum.

Not only do our products look and feel great, they're also supremely functional. We strive to set new standards in everything we do. Whether it's the collar, the sleeves or the cuffs – we're meticulous about every part of every garment, no matter how big or small.

## INNOVATION

Innovation has been at the heart of BMW Motorrad since it was established in 1923. We've also led the way in the development of rider equipment since the mid-seventies. We've invested in years of research, development and testing to create solutions that meet a wide-ranging set of requirements for motorcycling clothing – with the aim of making the best even better.

Our groundbreaking BMW climate membrane technologies are prime examples of this: c\_change™ breathes in summer to keep riders cool, while locking in warmth on colder days, while the BMW climate membrane also offers a waterproof rating of 10,000mm. Combining unprecedented damping properties with maximum comfort, our NP and NP2 protectors are great examples of why BMW Motorrad rider equipment is at the forefront of innovation. Our Neck Brace system is also a landmark achievement: BMW Motorrad is the first manufacturer to significantly reduce the risk of damage to the neck area without affecting freedom of movement.

C.A.R.E. is more than just a seal of approval – it's a promise to our customers that we're constantly breaking new ground to deliver safer, higher-quality and more comfortable products.

## QUALITY

At BMW Motorrad, we know that raising the bar means going to great lengths. That's why we put our products through mile after mile of testing to identify and eliminate any potential weaknesses. Every item in the BMW Motorrad rider equipment range is designed and built to endure the countless miles riders cover.

There are no legal requirements for quality and durability, so we decided to create our own standard with its own set of criteria. And this is something we're taking very seriously. In our dedicated laboratory, every item of BMW Motorrad rider equipment is tested down to the last detail to ensure incomparable quality – and this includes the development processes and the materials used to make them.

We shake, scrape and smash practically everything within our reach in our test facilities. As a result, you're unlikely to find the same level of quality anywhere else.

# C.A.R.E. STANDARDS – HOW THEY MEASURE UP

## SAFETY

CATEGORY	INDUSTRY STANDARD	C.A.R.E. STANDARD
Impact absorption	There is no legal requirement for specially fitted right and left-side protectors.	BMW Motorrad offers right and left-side protectors that can be adapted to the rider's specific shape. They offer excellent impact absorption performance and have won countless consumer awards.
Tear resistance	Materials must be able to withstand a minimum force of 100 N/cm <sup>2</sup> . (DIN EN ISO 13937-2:2000; tear resistance*)	We aim to use materials that can resist a force of 1000 N/cm <sup>2</sup> .
Impact/abrasion resistance	In standard industry testing, materials are exposed solely to an abrasive belt running at approx. 29 km/h. (DIN EN ISO 13595-2:2002; impact abrasion resistance*)	The BMW testing institute simulates the impact, fall and slide of a 75-kg rider on motorway tarmac, at speeds of up to 120 km/h.
Helmet aerodynamics/ aeroacoustics	Helmets are tested individually for aerodynamic and aeroacoustic performance, without the rider or motorcycle.	We analyze the aerodynamics and aeroacoustics for the helmet (with both rider and motorcycle) over many hours of wind tunnel testing.
Helmet angles of sight	Standard regulations do not call for helmets to offer an expanded (and thus safer) field of vision.	By offering angles of sight that go beyond industry norms, our helmets provide a wider field of vision, particularly laterally. This significantly increases safety when riding in urban areas.

## INNOVATION

CATEGORY	INDUSTRY STANDARD	C.A.R.E. STANDARD
Water resistance	According to DIN standards, fabric with a water head of 1,300 mm is considered waterproof. (DIN EN 20811:1992; water resistance*)	The BMW climate membrane offers a 10,000-mm head of water, while also being incredibly breathable.
Practicality	Legal requirements do not call for motorcycle clothing to be tested in use at all.	BMW Motorrad test riders assess the practicality of every item we produce over numerous rides (including endurance testing) in a range of weather conditions.
Helmet water resistance	There is no legal requirement to integrate seals within the structure of helmets. If desired, manufacturers can simply apply seals using adhesive.	Our innovative seals are built into the structure of our helmets, and are not glued on. This ensures peerless protection and water resistance in even the toughest conditions.
Helmet angle of removal	By law, the maximum angle of removal permitted for helmets is 30 degrees. (ECE 22.05 roll-off test*)	BMW Motorrad enduro helmets, for example, offer an angle of removal of no more than 15 degrees, thanks to their innovative neck straps.

\* As of October 2014

## COMFORT

CATEGORY	INDUSTRY STANDARD	C.A.R.E. STANDARD
Fit and ergonomics	In general, only standardized sizes are available. (DIN EN ISO 340*)	The sizes we offer are based entirely on the dimensions measured and supplied to us by our customers.
Height-adjustable protectors	There is no legislation that requires knee protectors to be height-adjustable.	Our protectors are height-adjustable as standard, ensuring the perfect fit for each rider.
Helmet ventilation	Standard helmets offer ventilation around the upper part of the head only.	BMW Motorrad helmets are designed to allow air to circulate around the entire head. The chin and visor areas are well ventilated to ensure mist-free vision even in the toughest conditions.

## QUALITY

As there are no legal requirements for quality, we use the appropriate DIN EN ISO standards as a basis. BMW Motorrad requirements dictate that at least 5 of the 7 criteria should be met.

CATEGORY	INDUSTRY STANDARD	C.A.R.E. STANDARD
Resistance to fading	No industry standard.	Garment samples are spread out under xenon light to test their resistance to fading. (Taken from DIN EN ISO 105-B02:2002; resistance to fading*)
Rub fastness	No industry standard.	Each material is placed alongside a wet or dry testing fabric, and the two are rubbed together. The material's rub fastness is assessed based on the colouring of the test fabric. (Taken from DIN EN ISO 105-X12:2002; rub fastness*)
Colour fastness to perspiration	No industry standard.	Textiles are placed alongside a testing fabric soaked in sweat, and the two are rubbed together. (Taken from DIN EN ISO 105-E04:2013; fastness to perspiration*)
Oil repellency	No industry standard.	Materials are tested for their resistance to oil and petrol in the same way as the colour fastness analysis. (Taken from DIN EN ISO 105-X12:2002; rub fastness*)
Fastener abrasion resistance	No industry standard.	Textiles are subjected to the Martindale abrasion test, at a force of 9 kPa over 4000 cycles, to assess their resistance to wearing. (VDA 230-210:2008, taken from DIN EN 530:2013; fastener abrasion resistance*)
Abrasion resistance	No industry standard.	Each material is rubbed against a standardized piece of test fabric over 30,000 cycles. (Taken from DIN EN ISO 12947-2:2007; wear resistance*)
Washing fastness	No industry standard.	Textiles are sewn into a piece of test fabric, then placed in a beaker full of detergent solution and agitated. The test fabric is then dried, and the colouring assessed. (Taken from DIN EN ISO 105-C06:2010; textile washing fastness*)
Helmet UV and impact resistance	No industry standard.	Our paint systems are subjected to strict testing to ensure they maintain their appearance and performance over time.
Helmet chin section wear	No industry standard.	In fatigue testing, the opening and closing of the visor and chin section is repeated over and over again. This ensures the helmet functions correctly throughout the entire life cycle.

# HELMETS

BMW Motorrad helmets offer the ultimate in safety, practicality and comfort. Whether you're touring or sprinting around the track, there's a model that's up to the task. Each one guarantees an unobstructed field of vision, proper ventilation and outstanding aerodynamic design. The System 7 Carbon flip-front helmet is the perfect example: The System 7 Carbon flip-front helmet is the perfect example: with its removable chin bar and 100% carbon-fibre shell, it provides peerless all-round performance that you'll feel from the very first ride.

**GS CARBON HELMET**

- Enduro helmet, perfect for touring (two helmet shell sizes available)
- 100% carbon-fibre-reinforced plastic shell
- High-level impact reduction and safety performance
- EPS inner shell made up of several sections
- Double-glazed, three-dimensionally curved visor
- Anti-fog inner visor, outer visor has anti-scratch coating on both sides
- Spoiler and removable peak for optimised aerodynamics
- Highly effective ventilation system
- Removable chinbar vent flap and built in dust filter for off-road and hot-weather riding
- Removable, washable head and cheek pads
- Neckbands to keep the helmet securely in position
- Ready for BMW Motorrad communications system
- ECE 22-05 approved
- Weight: approx. 1,450 grams with shield and double visor
- Silver/blue-mirrored and tinted visors also available

**SIZES**

52/53 – 62/63

These goggles are a perfect match for the GS Carbon helmet and offer excellent ventilation for off-road use. Naturally, they also comply with the EN 1938:1998 safety standard. The width-adjustable strap and comfortable padding make them a pleasure to wear. Also available with easy-change transparent, tinted or orange double glazed lens.

RACE HELMET

For helmets to deliver maximum safety, they must combine a number of different functions. As you'd expected, the full-face Race helmet is exceptional when it comes to impact absorption. It has been tested extensively on the racetrack to ensure a fit that enables riders to focus on the road ahead and react at lightning speed.

- Full-face helmet suitable for the racetrack
- Glass-fibre/carbon-fibre outer shell in two sizes
- Inner shell made from multi-segmented EPS
- Large spoiler for maximum stability even at speeds over 300 km/h
- Visor with wide field of vision, two-dimensionally curved, with anti-scratch coating on both sides
- Anti-fog inner visor
- Effective ventilation for visor and chin area
- Visor lock button at the side
- Enlarged neck contour for comfort in the prone riding position
- Double D buckle
- Neck straps for stability
- Washable liner
- All colours supplied with clear visor and one set of tear-offs
- ECE 22-05 approved
- Weight: 1,350 grams (small helmet shell)
- Tinted visor also available

COMMUNICATION SYSTEMS.

BMW Motorrad communication systems are the most convenient and reliable way to connect with other riders. This is achieved via wireless verbal communication between two helmets. Each helmet can also be connected to the BMW Motorrad Navigator and a Bluetooth-enabled mobile device or music player. The systems are designed to make communication as easy as possible out on the road – they're lightweight, easy to use and deliver outstanding sound quality.

# SUITS

Motorcycle riders know the value of all-round protection from wind and rain as well as anyone. That's why, with products like the one-piece CoverAll suit, waterproof touring apparel and the two-piece leather suit, BMW Motorrad offer a range of integrated solutions covering virtually any conditions. The latest highlight, the EnduroGuard, is a robust off-road riding suit and the ideal companion for uncompromising globetrotters.

### STREETGUARD SUIT

#### CUTS FOR MEN AND WOMEN

Whatever your ride has in store, the StreetGuard suit will be ready. Equipped to tackle every weather condition and road surface, it features elasticated 3-Perform material and removable NP2 protectors, setting new standards in safety and rider comfort. Waterproof, windproof and incredibly breathable, this genuine all-rounder is available in three eye-catching designs, with either a short or long jacket.

- Professional-grade touring suit for year-round use
- Short or 7/8-length long jacket with adjustable waist
- 3-Perform material: abrasion-resistant, elasticated three-layer laminate
- Double-thickness ProtectionGuard material in vulnerable areas
- Removable NP2 protectors at shoulders, elbows, back, hips and knees (adjustable to three different heights)
- Coccyx protector retrofittable
- Waterproof, windproof and highly breathable thanks to BMW climate membrane
- Detachable storm collar with integrated storm hood
- Removable thermal insert for trousers and windproof thermal inner jacket with excellent insulation; can also be worn separately
- Steplessly adjustable trouser waist
- Zip-up bib and adjustable braces on men's trousers
- Zip-up raised waistband with anti-slip effect on women's trousers
- Ventilation zippers on jacket and trousers
- Waterproof jacket and trouser pockets, and sophisticated pocket for multimedia devices
- Reflective print on front, back and trouser legs
- Connector zip: 40 cm (all-round)
- Comfort fit

Black/Red (46–60)

MATERIAL INFORMATION:  
HYDROPHOBIC LEATHER

The best water-repellent qualities are obtained when only the leather fibres are encapsulated and the pores are left open, helping to maintain breathability. Sustainable, environmentally friendly finishing in a German tannery makes the leather even better for your skin.

Colour: Anthracite

ATLANTIS SUIT

# JACKETS/ TROUSERS

Comprehensive protection is essential for every rider – for the back and knees in particular. A lot of that comes down to what you wear out on your bike. Whatever your clothing is made of – genuine leather, tough synthetic fabric or water-resistant denim – three things matter most: total comfort, a stylish fit and maximum safety.

# GLOVES

A rider's hands need the best possible protection at all times. BMW Motorrad offers wind and waterproof gloves, reinforced on the sides and at the ball of the hand, to ensure a firm grip on proceedings in all conditions. There's no compromise on comfort, either: the Two-in-One glove, for example, comes with multi-purpose two-chamber technology and touchscreen-compatible fingertips.

Two in One gloves	66
EnduroGuard gloves	67
DoubleR gloves	68
AirFlow gloves	69
Rallye gloves	70
GS Dry gloves	70
Atlantis gloves	71
ProSummer glove	71

DownTown gloves	73
Rockster gloves	74

TWO IN ONE GLOVES

- UNISEX**
- Sport-style GORE-TEX® glove with Gore 2in1 technology
  - Unparalleled versatility: allows the wearer to choose between a lightweight, unlined, sporty feel or a lined waterproof glove
  - SuperFabric and shock-absorbing foam on ball of hand
  - Double-thickness leather at edge of hand
  - Plastic protective shell over knuckles, with shock-absorbing foam
  - Lightweight foam on finger backs
  - Wiper lip on left index finger
  - Touchscreen-sensitive index finger and thumb
  - Colour markings make glove easy to put on and take off

**COLOUR**  
Black

**SIZES**  
6 - 6½ – 12 - 12½

ENDUROGUARD GLOVES

- UNISEX**
- Enduro glove with two-chamber technology; switch between chambers depending on the weather
  - PROOF upper chamber is windproof, waterproof and breathable thanks to a GORE-TEX® membrane and Gore 2in1 technology, and has a light, insulating Pikee jersey lining
  - GRIP lower chamber is made of abrasion-resistant kangaroo leather (approx. 0.7 mm thick), unlined and perforated for optimum grip
  - Upper hand material is a mix of soft cowhide and schoeller®-dynatec
  - Highly abrasion-resistant ceraspace protection technology on knuckle shell and on the ball of the hand
  - Two layers of leather at the edge of the hand
  - Plastic hard-shell knuckle protector with impact-absorbing foam padding
  - Lightweight foam on backs of fingers and hand
  - Touchscreen-sensitive index finger and thumb
  - Rubber wiper lip on left index finger
  - Medium-length cuff with hook-and-loop fastener for adjustment at wrist
  - Reflective material on the outside of glove
  - Special seams at fingers and palm, no pressure points
  - prEN 13594 certification

**COLOUR**  
Black/Grey

**SIZES**  
6 - 6½ – 12 - 12½

NEW

DOUBLE R GLOVES

- UNISEX**
- Hard-wearing yet flexible sports glove
  - 100 % kangaroo leather
  - Double-thickness SuperFabric material on edge and ball of hand, lined with shock-absorbing gel
  - Plastic protective shell over knuckles, with titanium inserts (previously Kevlar); firm fit provides increased protection
  - Impact-absorbing SuproTec foam on the back of the hand, thickness varies depending on function and zone
  - Stretch inserts for a more comfortable fit

**COLOUR**  
Blue/White/Red/Black

**SIZES**  
6 - 6½ – 12 - 12½

AIRFLOW GLOVES

- UNISEX**
- Light, well-ventilated summer glove
  - Breathable goatskin leather and air-permeable schoeller® AirTex zones on the back of the hand
  - Perforations between fingers and on back of hand for improved ventilation
  - Double-thickness material on palm; ball of hand padded with schoeller®-keprotec®
  - Leather-covered plastic protective shell over knuckles with vents, padded with shock-absorbing foam
  - Lightweight foam on finger backs
  - Short cuff with Velcro for adjustment at the wrist
  - Soft material at wrist to prevent chafing
  - Fingers curved forwards for perfect fit; stretch leather on fingers
  - Palm unlined for a firmer grip
  - Suede thumb for wiping visor

# FUNCTIONAL CLOTHING

Seasons make little difference to true motorcycling fans. Come wind, rain or sun – when tackling the elements, they’re in their element. BMW Motorrad provides a tip-to-toe range of functional clothing and safety accessories that helps riders enjoy their time out on the road to the full, even in the worst conditions.

Vests	78
Suits & jackets	80
Wet-weather suits	83
Kidney belts & performance socks	84
T-shirts & underwear	86
Storm hoods & tubes	90
Protective equipment	92

HIGH VIZ VEST

- UNISEX**
- Bright yellow vest made of air-permeable polyester
  - Large reflective panels on the chest, back and sides
  - Excellent visibility in all weather conditions
  - Elasticated polyamide and elastane inserts on both sides
  - Close, flutter-free fit
  - Can be worn with all BMW Motorrad jackets
  - Certified in accordance with EN 1150

**COLOUR**  
Neon Yellow

**SIZES**  
XS–4XL

COOLDOWN VEST

- UNISEX**
- This revolutionary performance vest uses evaporation to cool the wearer. When the vest is wet, the HyperKewl system locks in the moisture and stores it for up to eight hours, reducing heat by 6 to 12 °C compared to the ambient temperature. At the same time, clothing stays perfectly dry.

- A cooling vest with HyperKewl functional fabric at the back and front
- Constant cooling effect through evaporation
- Outer: nylon and polyester functional fibre
- Stretchy side sections
- Front zip

**COLOUR**  
Black

**SIZES**  
XS–2XL

HEAT UP VEST

- UNISEX**
- This lightweight, sport-style vest fits beneath all BMW Motorrad jackets, and keeps the wearer warm in cool weather. The heating elements are positioned according to the specific requirements of motorcycling, while the vest's settings can be adjusted via the optional controller. Please note the controller is not supplied as standard, and must be purchased separately.

- Warming polyester vest with slim-cut fit
- Breathable, moisture-wicking and windproof
- Five heating elements located in the chest, back and kidney area
- Three heating levels, max. 35W at 12V
- Plugs into on-board socket
- Lightweight fleece lining for optimum insulation
- High, insulating collar
- One inside pocket

**COLOUR**  
Black

**SIZES**  
XS–3XL

PCM SUIT

UNISEX

- Two-piece undersuit for autumn, winter and spring
- New, improved layout of elements and materials for improved comfort beneath a motorcycle suit
- Powerstretch outer material with fleece inner layer and smooth outer layer
- Heat-regulating phase change material on chest, thighs and knees
- Windbreaker material on upper arms and kidney area
- High collar made of fleecy thermal Powerstretch
- Jacket with two zippered side pockets
- Trousers with comfortable rubber strap

COLOUR

Black

SIZES

XS–4XL

PCM JACKET

UNISEX

- Functional jacket with detachable sleeves
- Phase Change Material (schoeller PCM in front and back) actively compensates for differences in temperature, increasing comfort
- Sleeves and side sections made of 100 % soft shell; sleeves thinly padded
- Two side pockets with zips and mesh lining

COLOUR

Black

SIZES

XS–4XL

RIDE QUILTED JACKET

CUTS FOR MEN AND WOMEN

- Functional quilted jacket, light and thin, yet comfortably warm and breathable
- Can be worn with all motorcycling jackets or on its own
- Polyamide outer
- Thin PrimaLoft® padding (80 g), doubled at elbows and shoulders
- Soft shell stretch inserts at sides for improved fit
- Loop on collar for fastening to motorcycle jacket
- Zip on lower back for access to 40-cm connector zips on motorcycle jackets and trousers
- Water stop at the lower hem and collar prevents water absorption in rain
- Snug collar for added comfort
- Two zippered outer pockets, PackAway inside pocket (packs down to a small size)
- Biker look with quilting on the elbows and shoulders
- Fitted cut, women's jacket also tapered at the waist
- Regular fit

# BAGS/ ACCESSORIES

Whatever the weather, there will always be riders out and about – which is why the right equipment is absolutely essential. No matter how rough the conditions, there’s a suitable soft-luggage solution in the BMW Motorrad range. Take the luggage roll, for example. It attaches quickly and easily to every BMW motorcycle, and it’s equally suitable for day trips or lengthy tours.

- Includes adjustable straps with snaplock buckles – easy to attach
- Reflective material on front and sides, BMW Motorrad reflective print

**COLOUR**

Dark Blue

**SMALL SOFTBAG**

- Rear bag made of flexible material
- Capacity expandable from approx. 30 to 35 litres
- Waterproof main compartment, four water-resistant outer pockets
- Tear-resistant fabric-finish polyester
- Formed EVA base and back
- Detachable shoulder strap, carry handle
- Versatile and easy to attach
- Retaining tabs, adjustable straps and snaplocks
- Large reflective areas on front and sides

**COLOUR**

Dark Grey

**LARGE SOFTBAG**

- Rear bag made of flexible material
- Capacity expandable from approx. 50 to 55 litres
- Waterproof main compartment, four water-resistant outer pockets
- Tear-resistant fabric-finish polyester
- Formed EVA base and back
- Detachable shoulder strap, carry handle
- Versatile and easy to attach
- Retaining tabs, adjustable straps and snaplocks
- Large reflective areas on front and sides

**COLOUR**

Dark Grey

**MESSENGER BAG**

- High-quality shoulder bag with water-repellent canvas outer layer
- Large, waterproof main compartment with roll closure
- Interior: padded 17-inch laptop compartment and bottle holder
- Two zipped outer pockets, A4 at back, front with organizer
- Decorative locking belt, metal closure with BMW decoration
- Length-adjustable, two-colour shoulder strap
- Additional carry handle
- Length-adjustable, detachable waist strap for fixing when riding
- W x H x D: approx. 47x35x11 cm
- Capacity: approx. 18 l

**COLOUR**

Black

**NEW**

**RIDE HIP BAG**

- High-quality hip bag for travelling on and off the motorcycle
- Waterproof main compartment with two-way zip
- Inner bag with roll closure ensures main compartment stays waterproof
- Small mesh pocket on the left-hand side, three more small outer pockets with zips
- 3D-Mesh on the back for optimum air circulation
- Steplessly adjustable hip belt; handle loop
- Decorative reflective print (boxer engine) on the front
- BMW Motorrad logo on lid
- Functional outer material made from textile-look polyester; waterproof, easy-care
- HxWxD: approx. 18x20x11 cm
- Capacity: approx. 3l

**COLOUR**

Black

NOT ALL CARE PRODUCTS ARE CURRENTLY AVAILABLE IN AUSTRALIA

CARE PRODUCTS

- BMW functional detergent: protects functional garments and keeps materials windproof, waterproof and breathable
- BMW waterproofing agent for fabric and leather (not suitable for nubuk); repels water and oil and provides a protective seal
- BMW motorcycle cleaner: cleans all motorcycle components with ease, without harming the bike or the environment
- BMW chain spray: spreads evenly, holds well, and resists rain and extreme temperatures
- BMW visor and helmet cleaner: removes dirt and insect remains effectively, without damaging the equipment
- BMW anti-misting spray: prevents fogging and repairs light scratches
- BMW helmet liner cleaner: removes dirt, deodorizes and refreshes helmet linings

TRINKPAK HYDRA

- Two-litre drinking system with tube
- Pouch is quick and easy to clean: just turn it inside out
- Shape-Shift™ technology and inner zip keep the system in shape
- Flexible, hard-wearing 0.25-mm thermoplastic polyurethane
- Handy slide opening for ease of access
- Contains no bisphenol A or PV
- Dishwasher-safe
- Volume: 2l/70 fluid oz

RIDE SUNGLASSES

- Stylish, high-performance metal-framed sunglasses
- Scratchproof lenses, tinted in Dark Grey
- 100 % UVA, UVB and UVC protection, even in bright sunlight
- Designed to fit comfortably inside your helmet
- Close fit provides slipstream protection
- Soft plastic nose pads prevent pressure discomfort
- BMW Motorrad logo on both arms
- Includes case and microfibre pouch, both BMW-branded

COLOUR

Gun

FUNCTIONAL SUNGLASSES

- Cool, sporty and lightweight performance sunglasses
- Switchable plastic lenses for different weather conditions:
  - Brown = high-contrast, anti-mist coating
  - Grey = slightly mirrored, scratchproof coating
  - Clear = anti-reflection and scratchproof coating
- Dark-coloured glasses offer 100 % UVA, UVB and UVC protection, even in bright sunlight
- Designed to fit comfortably inside your helmet
- Highly curved, close-fitting design fit provides slipstream protection
- Black plastic frame with Anthracite gummed-plastic inserts
- Soft plastic nose pads prevent pressure discomfort
- Includes case and microfibre pouch, both BMW-branded

COLOUR

Black/Anthracite

MIX AND MATCH / HOW TO WORK OUT YOUR SIZE

General:

Use adaptors to combine the connector zips of new 40-cm models with earlier 30-cm ones.

Adaptors

40 cm jacket/30 cm trousers

30 cm jacket/40 cm trousers

Sizes of designs with all-round zips can be combined as follows:

Women	Men
36/18/72	48/50/98/102/24/25
42/44/21/22/84/88	56/58/27/28/114/118
	60/62/29/30
	64/66/31/32

Ask your BMW Motorrad dealer for details on how to combine previous and new rider equipment.

How to work out your size

It's very important that your motorcycle suit is a good fit, not least because if it's too tight or too loose, it can affect your concentration. And if you're distracted, this affects your safety on the road.

Jackets and trousers also have to sit right on the wearer. Your sleeves and trouser legs shouldn't ride up, because if they do, it's not just a safety issue – it also means you're not properly protected against the elements.

That's why the cut of all BMW Motorrad suits is specially designed for motorcycling use, and why they all feature plenty of expandable sections, opportunities for adjustment and other clever details. To make sure your suit is a perfect fit, all of its dimensions have to be exactly right. We know that riders come in many different body shapes, so our suits are available in over 40 different sizes. To find the one that's right for you, grab your tape measure and follow these simple instructions.

A Height

Stand barefoot beside a door frame. Place a book on your head, and hold it in position. Mark the position of the book on the door-frame, and measure from the floor.

B Chest

Take this measurement while wearing a shirt or lightweight pullover. Pass the tape measure under your arms, and measure around the broadest part of your chest and over the shoulder blades.

C Waist

Measure around your shirt, just above the top of your trousers. Stand in a natural position and don't hold in your stomach – that way you'll ensure the trousers sit comfortably.

D Hips

Measure around your body, above your trousers and the widest point of your hips.

E Outside leg

Measure the distance down the outside of your leg, from the waist of your trousers to the sole of your foot.

F Inside leg

Measure the distance down the inside of your leg, from the crotch seam to the sole of your foot.

SIZE TABLE

Each product listing shows which size table to use.

WOMEN	International sizes	Size	Height	Chest	Waist	Hips	Outside leg	Inside leg
Normal	XS	34	168	80–83	64–67	89–92	106	78

<b>AirTex</b> <div>With a resistant, net-like Dynafil structure, AirTex allows air to flow freely, keeping you cool even at higher temperatures. It is extremely light, yet offers all the safety you'd expect from a motorcycling jacket, and is ideal for hot-weather riding.</div>	<b>Design</b> <div>The characteristics of BMW design include the use of classic shapes and colours.</div>	<b>Hydrophobic treatment</b> <div>A treatment which renders leather water-resistant. BMW uses the vat immersion technique. During this process, only the leather fibres are coated, to ensure the pores stay open and the leather remains breathable. Depending on use, dry cleaning ensures the garment maintains its waterproof performance over several years.</div>
<b>Azo dyes</b> <div>These may not be used in coloured outer materials since they can break down into carcinogenic amines.</div>	<b>DuPont Coolmax</b> <div>DuPont Coolmax consists of hollow fibres which transport humidity to the outside very quickly by capillary action, making the material dry 50% faster than cotton.</div>	<b>HyperKewl system</b> <div>The HyperKewl water management system absorbs and stores moisture, then gradually releases it via evaporation. This has a cooling effect that reduces heat by 6 to 12°C, compared to the ambient temperature. It means the body stays cooler, and is better able to perform in challenging conditions.</div>
<b>BMW climate membrane</b> <div>A functional membrane that meets BMW standards and is breathable, waterproof and windproof.</div>	<b>Dynafil</b> <div>A highly tear-resistant polyamide yarn that is even more robust than Cordura 500/700 and resistant to high temperatures.</div>	
<b>Breathability</b> <div>Technically defined in terms of resistance to evaporating heat transfer (RET). The lower the RET, the more breathable the material.</div>	<b>Dynatec</b> <div>Fabric made of Dynafil. Tear-resistant and extremely robust, with a melting point of 290° C.</div>	<b>Insert</b> <div>A removable membrane allowing a wide variety of uses in different climates. For protection, it is embedded in a very lightweight fabric on the top and bottom, and the first layer of the jacket will get wet if it rains.</div>
<b>c_change</b> <div>Also combined with the bionic c_change climate membrane in a three-layer laminate. The intelligent c_change membrane adapts the size of its pores according to the exterior temperature, thus allowing the skin to breathe in hot weather, and locking in heat on colder days.</div>	<b>Expanding pleats</b> <div>The upper material is sewn onto the stretch fabric in a corrugated form. This allows the compound to stretch, making the tear-resistant outer material even safer.</div>	<b>Kangaroo leather</b> <div>Finer, more closely woven fibres and a tighter structure make this leather even more durable than cowhide.</div>
<b>Carbon</b> <div>High-strength chemical fibre that is 30 % lighter than glass fibre and superior in terms of safety performance.</div>	<b>Full-face helmet</b> <div>A helmet that encloses the head completely.</div>	<b>Keproshield</b> <div>Highly protective material made of Kevlar, Dynatec and cotton, bonded together with the c_change bionic membrane as a three-layer laminate, and treated with coldblack reflective technology.</div>
<b>CE test mark</b> <div>The CE (Communauté Européenne) mark indicates that the product complies with European Union safety directives.</div>	<b>Glass-fibre reinforced plastic (GFRP)/ carbon-fibre reinforced plastic (CFRP)</b> <div>The individual fibres (aramid, carbon, glass fibre) can be mixed in varying proportions as required. By changing the orientation and position of the fibres, different characteristics can be achieved – for example: low weight, high strength, high rigidity, low heat expansion, effective insulation and outstanding safety performance.</div>	<b>Keptotec</b> <div>A blend of Kevlar and PA fibres which enhances Kevlar’s already excellent stretchability and abrasion resistance. Used to reinforce those areas most at risk in a fall, such as the elbows, shoulders, knees and thumbs.</div>
<b>coldblack</b> <div>Treatment for dark material that reflects the sunlight and protects against UV rays, keeping suits cooler for longer.</div>	<b>GORE-TEX®</b> <div>A membrane made of teflon (polytetrafluorethylene). Countless microscopic pores prevent the penetration of large water droplets while allowing the much smaller water vapour molecules to pass through. The branch-like structure of the membrane means that it is also windproof.</div>	<b>Laminate</b> <div>A layered structure of various materials created by thermal adhesion (the adhesive is usually applied in spots), and particularly suited for use with all-weather membranes. Can also take the form of a lining laminate or three-ply laminate, and does not always need to be thermally attached to the outer material.</div>
<b>Cordura 500</b> <div>Nylon yarn consisting of 100% polyamide. The manufacturing process involves respinning and weaving the cut polyamide fibres. Has a melting point of 210° C.</div>		

<b>Leather</b> <div>Because all leathers are not equal, we only use the very best. With a minimum thickness of at least 1.2 mm for our suits, and often much more, they offer exceptional abrasion resistance as a result.</div>	<b>PCP/CP</b> <div>Pentachlorophenol (PCP) is banned under the German prohibited chemicals order of 14 October 1993, though it may be used in concentrations of up to 5 mg/kg in leather processing.</div>	<b>Serafil</b> <div>Highly tear-resistant safety yarn used in all BMW Motorrad motorcycle suits.</div>
<b>Material strength</b> <div>The specific combination of materials and protectors used in each product determines its abrasion resistance, tear resistance, impact resistance and burst strength.</div>	<b>3-Perform</b> <div>Abrasion-resistant, three-layer elasticated laminate that is windproof, waterproof and breathable thanks to the BMW climate membrane.</div>	<b>Shape-Shift™ technology</b> <div>This uses a partition in the reservoir to keep the drink tube flat even when the two-litre container is full.</div>
<div>Categories:<div>1 star: average</div><div>2 stars: good</div><div>3 stars: exceptionally hard-wearing in all areas</div></div>	<b>PITTARDS</b> <div>An English tannery that produces specially treated Cabretta leather, entitled WR-100/WR 100X. The leather absorbs very little water and is resistant to sweat, making it especially suitable for use in gloves. It is particularly soft to the touch, and remains so over the long term.</div>	<b>Safety, active and passive</b> <div>Active safety measures are designed to prevent accidents, for example by using reflective material for good visibility. Passive safety features aim to minimize the effects of an accident, for instance by employing impact-resistant protectors and outer materials.</div>
<b>Motorcycle-specific cut</b> <div>This cut takes account of the body's contours in the riding position. The tops of the sleeves are further forwards, the sleeves and legs are angled, and there are numerous other special design details.</div>	<b>PORON®</b> <div>A foam that comes in a variety of densities and specifications. Our gloves use specially designed foams that provide a high level of impact protection and keep their shape over a long period.</div>	<b>TFL Cool System</b> <div>Cool technology is used in dark leather and fabric garments. Thanks to a special manufacturing process, sunlight is reflected from the dark surface of the leather or fabric in the same way as from a light surface, making the outer material much less likely to overheat.</div>
<b>Nappa leather</b> <div>The upper surface of the hide. Smooth and slightly shiny, worked to a soft leather with a fine grain.</div>	<b>ProTechWool</b> <div>A unique blend of wool and polyamide. It's breathable, quick-drying and heat-conducting.</div>	<b>Ventilation</b> <div>Various materials and technologies are used to improve air circulation and regulation of body temperature.</div>
<b>Nickel-free accessories</b> <div>All BMW Motorrad buttons and zips are nickel-free to protect the skin.</div>	<b>ProtectionGuard</b> <div>Combines the looks, quality and technical properties of raw leather with the easy maintenance of a performance fabric.</div>	<div>Categories:<div>1 arrow: numerous systems/zips to assist ventilation</div><div>2 arrows: specific materials used for improved ventilation</div><div>3 arrows: outstanding ventilation</div></div>
<b>Nubuck leather</b> <div>A highly breathable leather with a slightly roughened surface, for a smooth, firm grip.</div>	<b>schoeller PCM</b> <div>Derived from space research, this material features special paraffin capsules that allow it to store heat when warm and release it when the temperature drops. This means it can minimize fluctuations in body temperature, keeping the rider comfortable. The material is at its most effective between 5 and 25° C.</div>	<b>Z-liner</b> <div>Here, the membrane is like a lining “suspended” between the outer material and the lining itself.</div>
<b>Nyspan®</b> <div>A bi-stretch fabric made from comfortable elastic yarn – deforms easily, but with excellent recovery properties.</div>	<b>Seamless bonding technology</b> <div>This process involves placing two pieces side by side, then covering the join with tape and pressure-bonding them with hot glue to create a flat, elastic join rather than a sewn seam.</div>	
<b>Off-road helmet</b> <div>A helmet with a chinguard and sunshield but no visor.</div>		
<b>Open-face helmet</b> <div>An open-face helmet with no chinguard or visor.</div>		

	<b>BMW climate membrane</b>		<b>Reinforced material</b>
	<b>GORE-TEX®</b>		<b>Removable protectors</b>
	<b>GORE-TEX® windstopper</b>		<b>Retrofittable protector.</b>
	<b>Fit</b> Helmet shell in a range of sizes.		<b>Reflective material</b>
